INVESTMENT COLUMN

Reading Bengaluru's growth areas carefully

Metro is the clearest driver today: the Pink Line has safety clearance while the Blue Line is still under construction, with services targeted for mid-2027. Buyers near either corridor may want to check which stage the work has reached.

Outer-ring projects sit earlier on the path. SWIFT City and Quantum City are at announced stage, the Business Corridor is tendered, and the Bidadi AI City is approved. Buyers may wish to check approvals, title and water.

The second airport at Harohalli is only proposed, and KWIN City is announced. These are considerations, not predictions; execution risk remains.

Considerations, not investment advice. Check approvals, title and RERA registration before buying.
